WORK EXPERIENCE

Powersoft19   **(Sept 2019 - Present)**
 React Native Developer / Mobile App Developer

- Working as a Senior Mobile App developer. There are a lot of different projects some are related to hardware communication and some are simple software based. Some application areas are mentioned NFC, Bluetooth, REST Apis Firebase Google Maps, Social Log, etc
- Developed React Native app "**Got Hyped**" Application is for some sort of auctions of products. Means there are multiple brands and all will post their products on the basis of different criteria. So users will bid on it and lucky one who meets the criteria will win the product.
- Developed React Native app **"The Kalculators".** It was born from a desire to offer expert accounting services.
- Developed **"TeraHub Wallet"** on React Native, Visual Studio Code & AWS. Light wallet for TERA block chain network. The decentralized wallet, i.e. it connects to the miners ' nodes based on the maximum power of the chain and the location of the node.
- Developed **"iAssign"** app on Android Studio. It is a safety app which helps to know when and where workers were exposed to dangerous conditions and gain visibility into unsafe worker behaviours using iAssign. The Tags make it easy to automatically track what's happening on a worksite and interpret gas detection data without the need for wireless connectivity.

NavicoSoft (March 2018 - Sept 2019)
Android Developer

- Worked as Android App developer. My core responsibilities were to develop smooth and seamless mobile apps.
- Developed **"Clicky Online Shopping App"** on React native with features of Push Notification, Social Media Login. Clicky.pk is an Online Shopping App to buy the trendiest fashion products with a variety of colours and designs.
- Developed **"Mobile Camera as CCTV"** on Android Studio. This is a live streaming app that connect your mobile camera as CCTV over IP.

Soft Techlogics (Feb 2017 - Mar 2018)
Android developer and Instructor

- I was the lead developer in Soft Techlogic and also I am the instructor for Android development in this Software House
- Developed mobile apps on Android Studio like Tour Management, Privacy Protection, Share Media, Ultimate Quotes, and Weather Forecasting mobile apps.
